

All-in-one retail demonstration unit.

MyMedia+ takes the core functionality of MyMedia, and extends its capabilities with the option to have up to 24 smart buttons. It's also easy to update to use on different displays, making it a flexible option that can be re-purposed future projects.

Overview

High performance in a small form factor

HD & UHD visual

HD audio

Dynamic smart push buttons

Touch screen compatible

Built for 24/7

Expansive IOs

Performance in a small form factor

MyMedia+ comes with a Quad-Core processor to power even the most demanding experiences, while the 2GB of RAM provides the flexibility needed for the varied amount of interactive content displayed instore.

HD & UHD visual

Built for spectacular visuals, MyMedia+ has a powerful integrated Graphics Processing Unit (GPU) that ensures smooth high-quality media playback even for UHD video.

HD audio

Built for great audio, MyMedia+ HD audio codec supports up to 24-bit/192kHz audio to ensure your product can sound its best.

Dynamic smart push buttons

MyMedia+ is compatible with Smart Push buttons that react to your customer's every press. The intelligent LED lighting flashes subtle patterns to grab attention, and then reacts to interactions, guiding the customer through their experience.

The buttons are made from high quality materials delivering durability for any retail environment. Each press has a satisfying audible feedback 'click' and light response.

Touch screen compatible

Connect a touch display and up the game by providing a whole new way to experience products in-store. Showcase fully interactive content with intuitive UI for richer videos, brand stories, lifestyle imagery, product information, compare charts and so much more.

Operating system

At the core of MyMedia+ is our custom Operating System (OS), this defines the functionality of your display and your customer experience. Updating existing experiences or repurpose it for future displays by simply swapping out the OS.

Built for 24/7

Built for retail. From the strong exterior, auto power up and superior ventilation, MyMedia+ is built to last.

MyPlayer platform

MyPlayer is the only point of purchase platform built around “plug n play” apps that come together to create completely unique in-store experiences. Combined with cloud based services for remote content updates, maintenance and customer data we can offer a reliable package that is proven to increase sales and deliver ROI.

Connections

Button Board: Connections for up to 24 smart push buttons
